Should You Hire, Outsource, or Work with an IT Consultant?

IT challenges for businesses are evolving rapidly. Projects are multiplying, technologies are changing, and required skills are becoming increasingly specialized. Meanwhile, resources do not always keep pace. You may feel your organization needs additional support, but you are not yet sure which approach to choose.

Should you strengthen your teams directly in-house?
Entrust your IT to a trusted external partner? Or bring in a consultant - somewhere in between the two? Each option comes with its own advantages, limitations, and, most importantly, impact on your organization.

In this resource, we help you gain clarity.
Our objective?
To give you the keys to choosing the solution best suited to your company, your objectives, and your internal challenges.

1 HIRING

IT Recruitment
(100% In-House)

2 OUTSOURCING

IT Outsourcing
(100% External)

3 CONSULTING

IT Consulting
(50-50 Approach)

1 HIRING

IT Recruitment (100% In-House)

THE PRINCIPLE
You hire an IT professional internally,
who becomes a full member of your team.

ADVANTAGES

• Strong understanding of your company,

its specific environment, and its tools

• Long-term commitment

• Sustainable development of internal expertise

DISADVANTAGES

• Recruitment timelines are often long and uncertain

• Difficulty finding qualified IT profiles

• Lack of flexibility during workload peaks or temporary needs

• High fixed costs (salary, training, talent retention)

• Need to continuously keep your IT staff up to date
  with evolving technologies and regulations

2 OUTSOURCING

IT Outsourcing (100% External)

THE PRINCIPLE
You entrust all or part of your IT operations to an external provider who manages them on your behalf.

ADVANTAGES
• Immediate access to a broad range of expertise
• Reduced internal management workload
• Predictable costs
• Guaranteed service continuity

DISADVANTAGES
• Less day-to-day operational control
• Increased dependency on an external provider
• More limited integration with your internal teams

What ABAKUS IT-SOLUTIONS can do for you

Our internal IT experts take full responsibility for your IT services: infrastructure, cloud, cybersecurity, support, operations, and more. You benefit from a single partner ensuring the stability, security, and performance of your IT environment.

3 CONSULTING

IT Consulting (50-50 Approach)

THE PRINCIPLE

A qualified IT consultant is assigned to you and integrated into your teams for a defined period, according to your technical needs.

ADVANTAGES

• Rapid access to specialized expertise

• High flexibility (duration, workload, expertise)

• Direct integration into your teams and projects

• No recruitment or retention constraints

DISADVANTAGES

• Temporary solution

• Requires clear scoping of needs and proper follow-up

What ABAKUS IT-SOLUTIONS can do for you

We provide qualified IT professionals who are immediately operational and aligned with your environment. Our consultants integrate seamlessly into your teams to strengthen your projects. They bring targeted expertise and help absorb workload peaks or major strategic challenges.

WHY IT CONSULTING MAY
BE THE BEST COMPROMISE

For some organizations, IT consulting combines the best of both worlds: the proximity and efficiency of internal resources, while maintaining the flexibility and expertise of external support. This solution allows you to move forward quickly without long-term commitments while retaining full control over your projects.

At ABAKUS IT-SOLUTIONS, we view consulting as a true partnership - not simply the provision of profiles.
We work with you to understand your challenges, culture, and context in order to propose experts who deliver real added value, both technically and in terms of interpersonal skills.
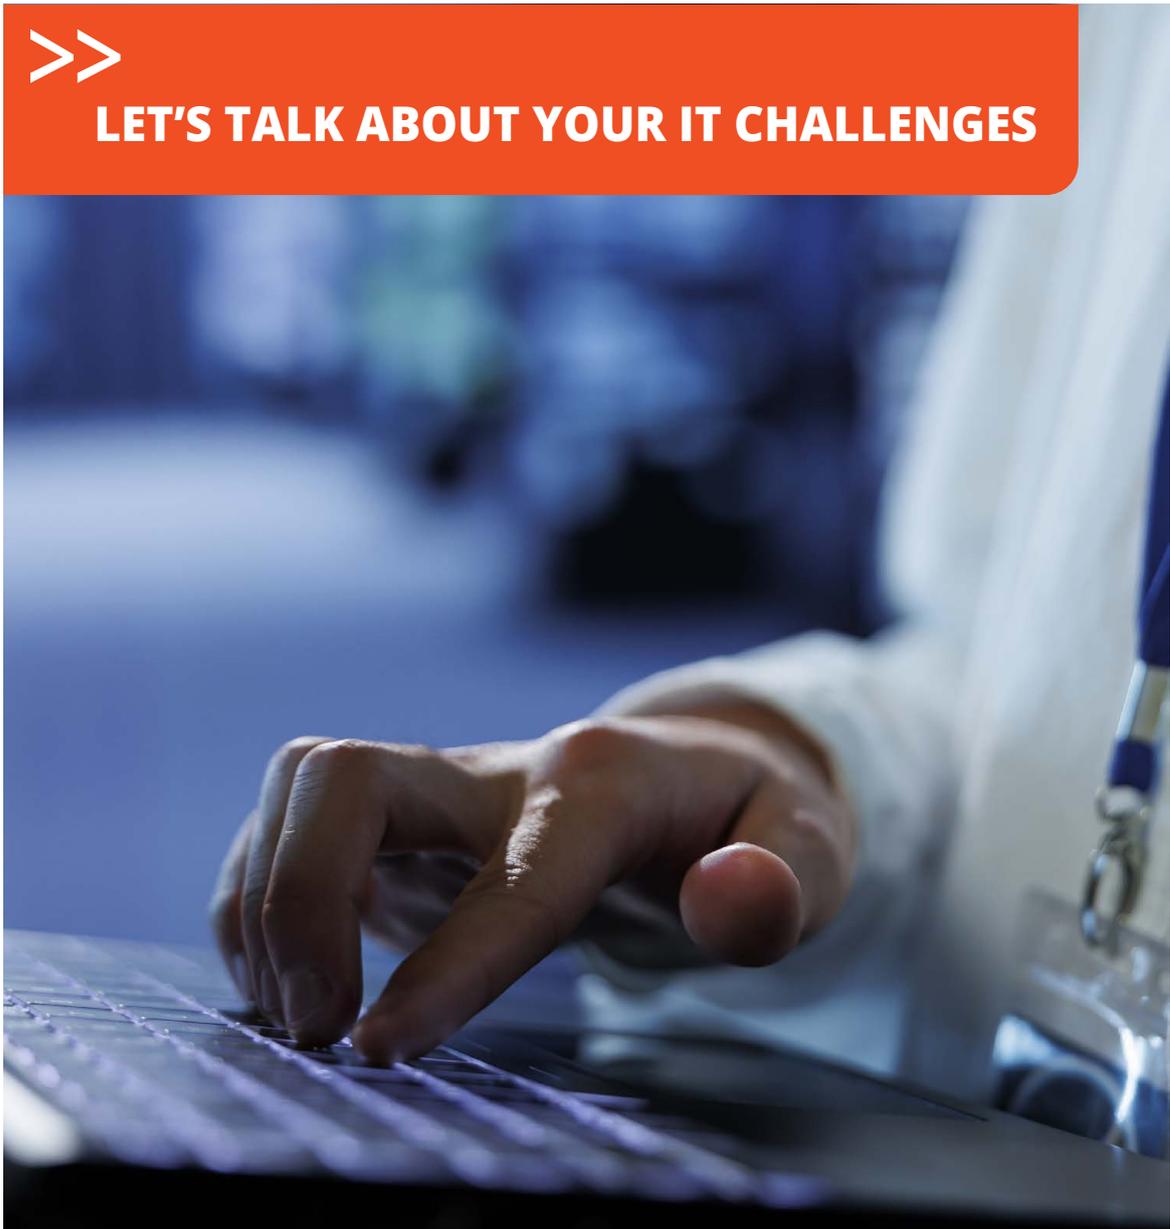

We continuously support our consultants throughout their assignments with you. We actively invest in their ongoing training, skills development, and career growth. This approach enables us to provide consultants who are engaged, aligned with your objectives, and capable of integrating sustainably into your teams.

READY TO MAKE YOUR CHOICE AND MOVE YOUR IT PROJECTS FORWARD?

Let's discuss your situation and identify together the solution best suited to your organization. Whether your need is short-term or strategic, ABAKUS stands by your side to strengthen your teams and bring your projects to life.
